

Laboratory Report

Laboratory #:	183621	Call Name:	Myra
Order #:	82275	Registered Name:	Montrave Myra
Ordered By:	Ellie Thompson	Breed:	Jack Russell Terrier
Ordered:	June 26, 2020	Sex:	Female
Received:	July 16, 2020	DOB:	Dec. 2018
Reported:	July 28, 2020	Registration #:	-

Results:

Disease	Gene	Genotype	Interpretation
Cranio-mandibular Osteopathy	SLC37A2	WT/WT	Normal (clear)
Degenerative Myelopathy	SOD1	WT/WT	Normal (clear)
Hyperuricosuria	SLC2A9	WT/WT	Normal (clear)
Late Onset Ataxia	CAPN1	WT/WT	Normal (clear)
Primary Lens Luxation	ADAMTS17	WT/WT	Normal (clear)
Severe Combined Immunodeficiency Disease (Terrier Type)	PRKDC	WT/WT	Normal (clear)
Spinocerebellar Ataxia	KCNJ10	WT/WT	Normal (clear)

WT, wild type (normal); M, mutant; Y, Y chromosome (male)

Interpretation:

Molecular genetic analysis was performed for seven specific mutations reported to be associated with disease in dogs. We identified two normal copies of the DNA sequences in the mutations tested.

Recommendations:

No mutations were identified. Thus, this dog is not at an increased risk for the diseases caused by or associated with the mutations tested. Because this dog is "clear" of these mutations, this dog will only pass the normal genes on to its offspring. Normal results do not exclude inherited mutations not tested in these or other genes that may cause medical problems or may be passed on to offspring. Paw Print Genetics® has genetic counseling available to you at no additional charge to answer any questions about these test results, their implications and potential outcomes in breeding this dog.

Helen F Smith, PhD
 Assistant Laboratory Director

Robert D. Westra, MS, DVM
 Assistant Medical Director

Normal results do not exclude inherited mutations not tested in these or other genes that may cause medical problems or may be passed on to offspring. These tests were developed and their performance determined by Paw Print Genetics®. This laboratory has established and verified the tests' accuracy and precision. Because all tests performed are DNA-based, rare genomic variations may interfere with the performance of some tests producing false results. If you think these results are in error, please contact the laboratory immediately for further evaluation. In the event of a valid dispute of results claim, Paw Print Genetics will do its best to resolve such a claim to the customer's satisfaction. If no resolution is possible after investigation by Paw Print Genetics with the cooperation of the customer, the extent of the customer's sole remedy is a refund of the fee paid. In no event shall Paw Print Genetics be liable for indirect, consequential or incidental damages of any kind. Any claim must be asserted within 60 days of the report of the test results.
